28UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA**IN RE: DA VINCI SURGICAL ROBOT  
ANTITRUST LITIGATION**

Case No. 21-cv-03825-AMO

**ORDER GRANTING CLASS  
CERTIFICATION**

Re: Dkt. No. 267

This is a putative antitrust class action related to surgical robots, their instruments, and whether the robot's manufacturer has engaged in anticompetitive conduct. This is one of two related cases before the Court alleging anticompetitive conduct by Defendant Intuitive Surgical, Inc. ("Intuitive").<sup>1</sup> The two cases involve similar antitrust claims – this case is brought by customers, and the other case is brought by a competitor. Plaintiffs' motion to certify the class was heard before this Court on January 23, 2025. Having read the papers filed by the parties and carefully considered their arguments therein and those made at the hearing, as well as the relevant legal authority, and good cause appearing, the Court hereby **GRANTS** Plaintiffs' motion, for the following reasons.

**I. BACKGROUND**

Intuitive manufactures the sophisticated da Vinci surgical robot system for minimally-invasive soft tissue ("MIST") surgery. Named Plaintiffs Larkin Community Hospital, Franciscan

---

<sup>1</sup> The related case is *Surgical Instrument Service Company, Inc. v. Intuitive Surgical, Inc.*, N.D. Cal. Case No. 3:21-cv-03496-AMO. Intuitive prevailed at trial in that case. At the time of writing, Surgical Instrument Service Company's appeal remains pending before the United States Court of Appeals for the Ninth Circuit. *See Surgical Instrument Service Company, Inc. v. Intuitive Surgical, Inc.*, 9th Cir. Case No. 25-1372.

1 Alliance, Inc., and King County Public Hospital District No. 1 (dba Valley Medical Center)  
2 (together “Hospital Plaintiffs”) collectively seek certification of a class of health care providers  
3 that purchased EndoWrists and service for the da Vinci surgical robots that they leased or  
4 purchased from Intuitive. ECF 267. Hospital Plaintiffs seek certification on all of their causes of  
5 action, including tying, exclusive dealing, and monopolization related to Intuitive’s aftermarket  
6 maintenance service (“service”) of the da Vinci robot (Am. Compl. (ECF 52, “FAC”) ¶¶ 173-85),  
7 as well as tying, exclusive dealing, and monopolization related to the EndoWrist instruments that  
8 attach to the robot (*id.*, ¶¶ 186-97).

9 Hospital Plaintiffs now move for an order certifying this action as a class action with a  
10 proposed class (the “Class”) defined as:

11 All entities that purchased da Vinci service and EndoWrists from  
12 Intuitive in the United States at any time from May 21, 2017, to  
December 31, 2021.

13 Mot. (ECF 267) at 1; *see also* FAC ¶ 163. The proposed Class excludes “government entities.”  
14 Mot. at 1 n.1.

15 On March 31, 2025, the Court issued its order regarding the parties’ cross-motions for  
16 summary judgment. *See* ECF 232. For purposes of this Order, the Court assumes familiarity with  
17 the Order re Cross Motions for Summary Judgment, the facts recited therein, as well as the  
18 Court’s subsequent orders in the case.

## 19 **II. DISCUSSION**

20 For Hospital Plaintiffs to obtain class certification, they “must make two showings.”  
21 *Olean Wholesale Grocery Coop., Inc. v. Bumble Bee Foods LLC*, 31 F.4th 651, 663 (9th Cir.  
22 2022) (en banc). First, they must satisfy the numerosity, commonality, typicality, and adequacy  
23 requirements of Rule 23(a) of the Federal Rules of Civil Procedure:

24 One or more members of a class may sue or be sued as  
25 representative parties on behalf of all members only if: (1) the class  
is so numerous that joinder of all members is impracticable;  
26 (2) there are questions of law or fact common to the class; (3) the  
27 claims or defenses of the representative parties are typical of the  
28

1 claims or defenses of the class; and (4) the representative parties will  
2 fairly and adequately protect the interests of the class.

3 Fed. R. Civ. P. 23(a). Second, they “must show that the class fits into one of three categories”  
4 under Rule 23(b). *Olean*, 31 F.4th at 663.

5 “[P]laintiffs must prove the facts necessary to carry the burden of establishing that the  
6 prerequisites of Rule 23 are satisfied by a preponderance of the evidence. In carrying the burden  
7 of proving facts necessary for certifying a class under Rule 23(b)(3), plaintiffs may use any  
8 admissible evidence.” *Olean*, 31 F.4th at 665 (citing *Tyson Foods v. Bouaphakeo*, 577 U.S. 442,  
9 454-55 (2016)). “Rule 23 grants courts no license to engage in free-ranging merits inquiries at the  
10 certification stage. Merits questions may be considered to the extent – but only to the extent – that  
11 they are relevant to determining whether the Rule 23 prerequisites for class certification are  
12 satisfied.” *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds*, 568 U.S. 455, 466 (2013). Courts “must  
13 take the substantive allegations of the complaint as true” but “need not accept conclusory or  
14 generic allegations regarding the suitability of the litigation for resolution through class action.”  
15 *Keilholtz v. Lennox Hearth Prods. Inc.*, 268 F.R.D. 330, 335 (N.D. Cal. 2010) (citation omitted).

16 **A. Rule 23(a)**

17 The Court considers the Rule 23(a) elements in turn.

18 **1. Numerosity**

19 The class here “is so numerous that joinder of all members is impracticable.” Fed. R. Civ.  
20 Proc. 23(a)(1). “[C]ourts within the Ninth Circuit generally agree that numerosity is satisfied if  
21 the class includes forty or more members.” *Hilario v. Allstate Ins. Co.*, 642 F. Supp. 3d 1048,  
22 1059 (N.D. Cal. 2022), aff’d, No. 23-15264, 2024 WL 615567 (9th Cir. Feb. 14, 2024) (citations  
23 omitted). Intuitive does not dispute numerosity. Indeed, Intuitive admits in its Answer that the  
24 Class contains thousands of members. Answer ¶ 41 (ECF 74). The Class is sufficiently  
numerous.

25 **2. Commonality**

26 “Commonality” is a shorthand way of describing Rule 23’s requirement that there be  
27 “questions of law or fact common to the class.” Fed. R. Civ. P. 23(a)(2). “A common contention  
28 need not be one that will be answered, on the merits, in favor of the class. It only must be of such

1 a nature that it is capable of classwide resolution.” *Alcantar v. Hobart Serv.*, 800 F.3d 1047, 1053  
2 (9th Cir. 2015) (citation and quotation omitted). “[F]or purposes of Rule 23(a)(2) [e]ven a single  
3 [common] question will do.” *Wal-Mart Stores, Inc. v. Dukes*, 546 U.S. 338, 359 (2011) (internal  
4 citation omitted). Where questions common to class members present significant issues that can  
5 be resolved in a single adjudication, “there is clear justification for handling the dispute on a  
6 representative rather than on an individual basis.” *Amchem*, 521 U.S. at 623 (quotation marks and  
7 citation omitted). However, the common contention “must be of such a nature that it is capable of  
8 classwide resolution – which means that determination of its truth or falsity will resolve an issue  
9 that is central to the validity of each one of the claims in one stroke.” *Dukes*, 564 U.S. at 350.  
10 The inquiry turns on whether “the evidence establishes that a common question is *capable* of  
11 class-wide resolution, not whether the evidence in fact establishes that plaintiffs would win at  
12 trial.” *Olean*, 31 F.4th at 666-67 (emphasis in original). Courts consider whether a plaintiff has  
13 demonstrated that “the same evidence will suffice for each member to make a *prima facie* showing  
14 or the issue is susceptible to generalized, class-wide proof,” or if “members of a proposed class  
15 will need to present evidence that varies from member to member.” *Tyson Foods*, 577 U.S. at  
16 453.

17 Here, commonality is readily satisfied. The focus of the case is on Intuitive’s alleged  
18 anticompetitive conduct, along with its conduct’s effect on the market, not its impact on individual  
19 class members. Hospital Plaintiffs rely on common evidence to prove their claims, substantially  
20 relying on the expert opinions of Prof. Einer Elhauge. *See* Dominguez Decl., Ex. 1 (ECF 267-1,  
21 “Elhauge Class Rep.”).<sup>2</sup> Prof. Elhauge’s opinions bear on common questions related to how to  
22 define the relevant markets and whether Intuitive has power in those markets. Common questions  
23 of law similarly apply across the board to Intuitive’s antitrust liability, including whether Intuitive  
24 engaged in anticompetitive conduct, and whether that conduct ultimately violated federal antitrust  
25 law. The Court finds that, for purposes of the commonality assessment, the common contentions  
26 regarding Intuitive’s market-wide conduct, including threshold questions of market definitions, are  
27

---

28 <sup>2</sup> The Court earlier denied Intuitive’s motion to exclude the expert testimony of Prof. Elhauge. *See* Order re: Mots. Exclude Expert Witnesses (ECF 231) at 15-22.

1 capable of resolution “in one stroke.” *Dukes*, 564 U.S. at 350. Thus, for purposes of the Rule  
2 23(a) analysis, this element is satisfied.

3 Intuitive raises several arguments challenging the Hospital Plaintiffs ability to show  
4 commonality. Because its arguments related to commonality and predominance rest on similar  
5 evidentiary and analytical grounds, the Court elects to consider those arguments within the  
6 predominance analysis below.

### 7           **3.       Typicality**

8       Typicality exists if “the claims or defenses of the representative parties are typical of the  
9 claims or defenses of the class.” Fed. R. Civ. P. 23(a)(3). “The test of typicality is ‘whether other  
10 members have the same or similar injury, whether the action is based on conduct which is not  
11 unique to the named plaintiffs, and whether other class members have been injured by the same  
12 course of conduct.’ ” *Parsons v. Ryan*, 754 F.3d 657, 685 (9th Cir. 2014) (quoting *Hanon v.*  
13 *Dataproducts Corp.*, 976 F.2d 497, 508 (9th Cir. 1992)). A plaintiff’s claims are considered  
14 typical if they are “reasonably co-extensive with those of absent class members; they need not be  
15 substantially identical.” *Castillo v. Bank of Am., NA*, 980 F.3d 723, 730 (9th Cir. 2020). “[C]lass  
16 certification is inappropriate where a putative class representative is subject to unique defenses  
17 which threaten to become the focus of the litigation.” *Hanon*, 976 F.2d at 508 (citation and  
18 quotation omitted).

19       Intuitive opposes typicality on the final point – that the putative class representatives are  
20 each subject to unique defenses which threaten to become the focus of the litigation. The Court  
21 considers the typicality challenges Intuitive advances against each named Plaintiff in turn before  
22 turning to Intuitive’s catchall challenge against all three.

#### 23           **a.       Valley Medical**

24       Intuitive argues the certification motion’s exclusion of “government entities” from the  
25 proposed Class requires exclusion of Plaintiff Valley Medical, leaving this putative class  
26 representative’s claims atypical. Opp. at 21. Hospital Plaintiffs counter that Intuitive deliberately  
27 misreads the term “government entities” because that term is plainly defined in the Elhauge  
28 reports in a way that includes Valley Medical. *See* Reply at 10. The Court agrees with Hospital

1 Plaintiffs. Intuitive’s effort to problematize the government purchaser exclusion requires  
2 ignorance of Prof. Elhauge’s explicit description of the excluded government hospitals as  
3 “military or veterans’ hospitals.” *See* Elhauge Class Report ¶ 860. Though Valley Medical may  
4 be a government entity in a broad sense, it is not a government hospital as considered within the  
5 context of this case. Further, any potential ambiguity in Plaintiffs’ class definition can be clarified  
6 to include Valley Medical. *See, e.g., Dekker v. Vivint Solar, Inc.*, 2022 WL 829382, at \*9 (N.D.  
7 Cal. 2022) (revising proposed class definition to be “slightly more precise” before certifying  
8 class); *cf. Olean*, 31 F.4th at n.14 (approving judicial practice of “refining the class definition” to  
9 achieve greater precision). Therefore, Valley Medical need not face exclusion and its claims  
10 remain substantially identical to those of other class members to support typicality.

b. Larkin

12 Intuitive avers that Larkin is not a typical class member because it released its claims  
13 against Intuitive. An email chain exhibit submitted in support of Intuitive’s Opposition shows that  
14 Larkin and Intuitive negotiated a lease buyout for two surgical robots in early 2024. *See* Widman  
15 Decl., Ex. 1. As part of that buyout arrangement, Larkin sent an email of terms to Intuitive to  
16 settle amounts owed to the robot manufacturer. *Id.* In language proposed by Larkin, the  
17 settlement resolved “all pending disagreements and claims between” Larkin and Intuitive, who  
18 released each other “from all claims, liabilities and obligations of any kind.” *Id.*, Ex. 1 at 1.

19 Hospital Plaintiffs respond that the full context of the months-long email chain  
20 demonstrates that the parties never discussed a release of Larkin’s long-pending antitrust claims  
21 against Intuitive. *See* Reply at 11.<sup>3</sup> Moreover, Hospital Plaintiffs argue that Intuitive waived this  
22 argument by failing to raise this particular release for at least six months before filing its  
23 Opposition brief, despite the parties being heavily engaged in the instant litigation during the  
24 relevant period. *Id.*

27       <sup>3</sup> Larkin's Chief Financial Officer, Mark Early, submitted a declaration in support of Hospital  
28 Plaintiffs' Reply brief to demonstrate that he did not intend for the release to apply to this lawsuit.  
See Early Decl. (ECF 296-7). Intuitive objected to the submission of this declaration. ECF 298.  
The Court SUSTAINS Intuitive's objection and declines to consider the declaration.

1 Hospital Plaintiffs have the better argument. Intuitive knew of the purported release in  
2 February 2024. Widman Decl., Ex. 1. However, Intuitive made no effort to raise release as a  
3 defense until its opposition brief in the instant motion. Intuitive thus waived release as an  
4 affirmative defense by failing to timely assert it. *See In re Cellular 101, Inc.*, 539 F.3d 1150, 1155  
5 (9th Cir. 2008) (holding that a defendant's failure to promptly assert a release defense, even if  
6 agreement reached after the initial pleading stage, rendered the release defense waived). Because  
7 Intuitive has waived the release defense, the purported release does not render Larkin atypical.

8 **c. Franciscan**

9 Intuitive argues that Franciscan is not typical of the class because, contrary to the  
10 allegations of anticompetitive tying imposed on hospitals, Franciscan objected to a key term that  
11 the Hospital Plaintiffs challenge and was able to negotiate a contract without that term. *See* Bass  
12 Decl., Ex. 23 at -151 (proposing revision to delete provision that would have prohibited it from  
13 permitting an unauthorized third party to modify or alter its da Vinci system or instruments,  
14 including EndoWrists); Ex. 24 at -315 (final version omitting the clause). Intuitive advances that  
15 this presents a unique defense to Franciscan's claims that make it untypical of the putative class:  
16 Franciscan's success in rejecting a purportedly anticompetitive contract provision undercuts the  
17 notion that Franciscan was unlawfully coerced into agreeing to any of the challenged contract  
18 terms.

19 Hospital Plaintiffs argue that Intuitive overstates the effect of the contract negotiations  
20 because Intuitive refused to strike provisions that would have permitted Franciscan to use third-  
21 party EndoWrist repairs. *See* Glubiak Decl., Ex. 7 at -318 ("If Participant uses the System with  
22 any surgical instrument or accessory not made or approved by Intuitive, Intuitive may discontinue  
23 Services, and any warranties applicable to any Services provided prior to any discontinuance will  
24 be void."); *id.* ("Any other use [of Instruments and Accessories] is prohibited, whether before or  
25 after the Instrument or Accessory's license expiration, including repair, refurbishment, or  
26 reconditioning not approved by Intuitive."). Indeed, Intuitive admitted in its answer that "the  
27 SLSA [Sales, License and Service Agreement] between Intuitive and Franciscan prohibits  
28 Franciscan from engaging any unauthorized third party to service its da Vincis and from engaging

any unauthorized third party to repair, refurbish, or recondition EndoWrists at any time.” Answer (ECF 74) ¶ 17. Intuitive’s prohibition on third-party repair of EndoWrists applied to every class member regardless of the discrete clause that Intuitive contends was omitted from Franciscan’s agreement. *See* Answer ¶¶ 3-4, 13, 17, 20, 59, 73, 82, 107; Elhauge Class Rep. ¶¶ 421-430; Glubiak Decl., Ex. 8 (Vavoso Dep.) 194:7-199:2; Glubiak Decl., Ex. 7 at -315-320; Glubiak Decl., Ex. 9 at -489-491; Ex. 10 at -653-656. Franciscan’s claims are thus typical of the rest of the Class.

**d. Purported “lack of interest”**

Finally, Intuitive asserts that the named Plaintiffs’ “lack of interest in third-party EndoWrists and service” can defeat typicality. Opp. at 22. While Hospital Plaintiffs’ claims are premised on an anticipated demand from hospitals for remanufactured EndoWrists and da Vinci service that would have forced Intuitive to make downward adjustments to its prices in a but-for world, Intuitive posits that the Hospital Plaintiffs themselves demonstrate a reluctance to use the remanufactured EndoWrists and third-party servicing. Such reluctance would leave Hospital Plaintiffs’ claims untypical of the class. Intuitive avers that the question of each Plaintiff’s interest in such products and services would require individualized assessments, including each hospital’s process for evaluating non-price considerations, such as safety and regulatory requirements, as well as its risk tolerance.

The Court’s Order re Summary Judgment already credited the evidence that “[h]ospital demand” for EndoWrist repair was “monumental,” and that “the Hospital Plaintiffs have testified they are interested in utilizing repaired EndoWrists, but they have not sought to utilize such services because of contractual barriers imposed by Intuitive.” Order (ECF 204) at 4, 27. Indeed, the Court already rejected Intuitive’s argument that Plaintiffs failed to establish their interest in purchasing remanufactured EndoWrists and third-party servicing. *Id.* at 26-27, 29-30.

Further, Plaintiffs’ class-wide evidence of demand “sufficient to force Intuitive to make substantial and universal downward adjustments in its prices” does not turn on any single hospital’s interest in third-party EndoWrist repair or robot service. Opp. at 22. Rather, Hospital Plaintiffs present evidence that Intuitive’s conduct impacted all Class members, even those that

1 would not use third-party repair companies, on the basis that competition would have forced  
2 Intuitive to lower all its prices. *See, e.g.*, Elhauge Class Rep. §§ II.D, II.F.

3 Intuitive’s attempt to present individualized defenses falls flat where Plaintiffs have  
4 presented sufficient evidence of market wide impact to proceed against Intuitive’s allegedly  
5 anticompetitive practices. The purported “lack of interest” does not render these Hospital  
6 Plaintiffs’ claims untypical, and Hospital Plaintiffs satisfy the typicality element overall.

#### 7           **4. Adequacy**

8           To meet the Rule 23(a)(4) requirement of adequacy, “the plaintiff must show that (1) the  
9 named plaintiff and her counsel do not have conflicts of interests with other class members,” and  
10 that (2) the named plaintiff and plaintiffs’ counsel “will prosecute the action vigorously on behalf  
11 of the class, which includes a showing that class counsel is competent and qualified.” *Hilario v.*  
12 *Allstate Ins. Co.*, 642 F. Supp. 3d 1048, 1062 (N.D. Cal. 2022), *aff’d*, No. 23-15264, 2024 WL  
13 615567 (9th Cir. Feb. 14, 2024) (citation omitted). “Adequate representation depends on, among  
14 other factors, an absence of antagonism between representatives and absentees, and a sharing of  
15 interest between representatives and absentees.” *Ellis v. Costco Wholesale Corp.*, 657 F.3d 970,  
16 985 (9th Cir. 2011) (citation omitted).

17           Intuitive argues that Hospital Plaintiffs are not adequate representatives on the basis that  
18 there exists a conflict of interest between the Hospital Plaintiffs and other members of the putative  
19 class. *See* Opp. at 19-20. Intuitive avers that, as discussed below, even if one assumes some class  
20 members would have been better off in Hospital Plaintiffs’ but-for world, others would have been  
21 worse off because they would have paid more overall for the package of goods and services  
22 purchased to run their da Vinci programs. *Id.*

23           The Court finds the Class representatives “possess the same interest and suffer[ed] the  
24 same [alleged] injury as the class members,” indicating that their interests are “aligned.” *See*  
25 *Amchem*, 521 U.S. at 625-26. Plaintiffs and members of the proposed class share an interest in  
26 proving that Intuitive’s conduct violated the antitrust laws, and Plaintiffs have diligently litigated  
27 this case. The Court finds any potential conflict among class members remains speculative at this  
28 stage. *See Cummings v. Connell*, 316 F.3d 886, 896 (9th Cir. 2003) (noting that “this circuit does

1 not favor denial of class certification on the basis of speculative conflicts"); *see also In re Online*  
2 *DVD-Rental Antitrust Litig.*, 779 F.3d 934, 942 (9th Cir. 2015). Moreover, as explained more  
3 fully in the predominance analysis, Initiative's reliance on Hughes's report to conjure a seeming  
4 conflict – that some class members would have been better off and thus differently situated than  
5 injured class members – is misplaced. *See, infra*, at 14-19. Accordingly, the Court finds that the  
6 proposed Class Representatives satisfy the adequacy requirement.

7 Hospital Plaintiffs additionally seek to appoint Spector Roseman and Kodroff, P.C.,  
8 Hausfeld LLP, and Cohen Milstein Sellers & Toll PLLC as Co-Lead Class Counsel. The Court  
9 previously appointed these firms as Interim Co-Lead Class Counsel finding that they and their  
10 respective firms "performed substantial work on behalf of the potential class, facilitated the  
11 consolidation of separate actions on behalf of the plaintiffs, and have the knowledge, experience,  
12 and resources necessary to effectively represent the potential class." *See Order Appointing*  
13 *Interim Co-Lead Class Counsel* (ECF 54) at 1-2. For those same reasons, as well as counsels'  
14 diligent litigation of the case thus far, the Court confirms Spector Roseman and Kodroff, P.C.,  
15 Hausfeld LLP, and Cohen Milstein Sellers & Toll PLLC as Co-Lead Class Counsel.

16 **B. Rule 23(b)**

17 Hospital Plaintiffs seek certification under Rule 23(b)(2) and Rule 23(b)(3). The Court  
18 considers the (b)(3) class for damages first to resolve the primary focus of the parties' dispute.

19 **1. Rule 23(b)(3)**

20 Hospital Plaintiffs assert that the proposed damages class satisfies the Rule 23(b)(3)  
21 requirements because common questions relating to antitrust liability, injury, and damages  
22 predominate over questions affecting individual class members. Whether the Rule 23(b)(3)  
23 requirements have been satisfied – particularly the requirement of predominance – lies at the heart  
24 of Intuitive's challenge to class certification. The Court considers predominance and superiority  
25 in turn.

26 **a. Predominance**

27 In seeking to certify a Rule 23(b)(3) class, plaintiffs must show that the common questions  
28 "predominate over any questions affecting only individual members." Fed. R. Civ. P. 23(b)(3).

1 The predominance inquiry, while similar to the commonality requirement, goes further and “asks  
2 whether the common, aggregation-enabling, issues in the case are more prevalent or important  
3 than the non-common, aggregation-defeating, individual issues.” *Tyson Foods, Inc. v.*  
4 *Bouaphakeo*, 577 U.S. 442, 453 (2016). “The predominance test of Rule 23(b)(3) is ‘far more  
5 demanding’ than the commonality test under Rule 23(a)(2).” *Villalpando v. Exel Direct Inc.*, 303  
6 F.R.D. 588, 607 (N.D. Cal. 2014) (quoting *Amchem Prods.*, 521 U.S. at 624). “[T]o carry their  
7 burden of proving that a common question predominates, [plaintiffs] must show that the common  
8 question relates to a central issue in the plaintiffs’ claim.” *Olean*, 31 F.4th at 665. The Supreme  
9 Court has observed that antitrust cases “readily” meet the predominance requirement. *See*  
10 *Amchem Prods. v. Windsor*, 521 U.S. 591, 625 (1997).

11 Intuitive attacks predominance on two main bases. The Court first addresses Intuitive’s  
12 challenge regarding the sufficiency of Hospital Plaintiffs’ predominance showing as to their  
13 antitrust causes of action. Then, the Court considers Intuitive’s second challenge regarding the  
14 application of the statute of limitations to Class members’ claims.

15 **i. Antitrust Claims**

16 The predominance inquiry requires plaintiffs to demonstrate that common questions  
17 predominate as to each cause of action for which they seek class certification. *See Berger v. Home*  
18 *Depot USA, Inc.*, 741 F.3d 1061, 1068 (9th Cir. 2014), *abrogated on other grounds by Microsoft*  
19 *Corp. v. Baker*, 582 U.S. 23 (2017). As directed by the Supreme Court, to determine “whether  
20 ‘questions of law or fact common to class members predominate’ [the Court] begins . . . with the  
21 elements of the underlying cause of action.” *Erica P. John Fund, Inc. v. Halliburton Co.*, 563  
22 U.S. 804, 809 (2011). As a general matter, “[t]he elements of a claim for [an] antitrust action are  
23 (i) the existence of an antitrust violation; (ii) ‘antitrust injury’ or ‘impact’ flowing from that  
24 violation . . . and (iii) measurable damages.” *Olean*, 31 F.4th at 665-66 (citing *Big Bear Lodging*  
25 *Ass’n v. Snow Summit, Inc.*, 182 F.3d 1096, 1101-02 (9th Cir. 1999)). The Court takes up these  
26 three elements in turn.

27 //

28 //

**Antitrust Violation**

Hospital Plaintiffs advance they can satisfy predominance because Intuitive's alleged antitrust violations – tying, exclusive dealing, and monopolization – are the crux of the action. To establish a Section 1 tying claim, Hospital Plaintiffs must show “‘an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.’” *Epic Games, Inc. v. Apple, Inc.*, 67 F.4th 946, 995 (9th Cir. 2023), cert. denied, 144 S. Ct. 681 (2024), and cert. denied, 144 S. Ct. 682 (2024) (quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc.*, 504 U.S. 451, 461 (1992)). Relatedly, to make out a Section 1 exclusive dealing claim, Hospital Plaintiffs must show “an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor.” *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP*, 592 F.3d 991, 996 (9th Cir. 2010). Section 2 monopolization claims require “(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.” *Alaska Airlines v. United Airlines*, 948 F.2d 536, 541 (9th Cir. 1991) (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Co.*, 472 U.S. 585, 596 n. 19 (1985)). Accordingly, it is “the state of the market and defendants’ use and maintenance of monopoly power, as opposed to individual plaintiff’s conduct, drives the claim.” *In re Glumetza Antitrust Litig.*, 336 F.R.D. 468, 475 (N.D. Cal. 2020).

To support these various antitrust claims at this class certification stage, Hospital Plaintiffs rely on a report and regression analysis from Prof. Einer Elhauge. Domingues Decl., Ex. 1 (ECF 267-2, “Elhauge Rep.”). Prof. Elhauge’s report in support of class certification opines on a range of matters, including the definitions of the relevant antitrust markets (Elhauge Class Rep. §§ II.B, II.D, II.F), Intuitive’s share and power in those markets (*id.*, §§ II.C, II.E, II.G), the hypothetical world that would exist “but-for” Intuitive’s allegedly anticompetitive conduct (*id.*, § VI), and the damages incurred by class members based on the overpayment for Intuitive’s EndoWrists and da Vinci servicing (*id.*, § VII). Elhauge states in his class certification report that the inquiry into whether Intuitive’s conduct is anticompetitive is market-wide by its nature. Elhauge Class Rep.

1 ¶¶ 11, 77, 163, 357, 398, 418-19, 445-46, 447, 510, 517, 548, 549, 565, 567, 584, 585, 612, 648,  
2 668, 683.

3 In support of their Section 1 claims, Hospital Plaintiffs point to the SLSA contracts  
4 Intuitive formed with its customers. Every SLSA contract with every Class member prohibited  
5 EndoWrist repair and replacement and da Vinci servicing by third parties. Answer ¶¶ 3-4, 13, 17,  
6 20, 59, 73, 82, 107; Elhauge Class Rep. ¶¶ 421-430; Dominguez Decl., Ex. 2 (Vavoso (Rebotix)  
7 Dep.) 194:7-199:2; Ex. 14 (FRANCISCAN-00056314) at -315-320; Ex. 15 (LARKIN-00025488)  
8 at -489-491; Ex. 16 (VMC-00020652) at -653-656. In every SLSA, Intuitive additionally  
9 prohibited the use of EndoWrists beyond their use limits. *See, e.g.*, Dominguez Decl., Ex. 11  
10 (Intuitive-00067540) at -540-42; Ex. 2 (Vavoso (Rebotix) Dep.) 198:24-199:2; *see also* Answer  
11 ¶¶ 3-4, 13, 17, 20, 59, 73, 82, 107. Intuitive included in each SLSA the methods by which it  
12 would obtain compliance with these terms, including that Intuitive could cease servicing the da  
13 Vinci, cancel its warranty, terminate the contract, and withhold the sale of EndoWrists and  
14 replacement parts. *See* Elhauge Class Rep. ¶ 422; *see, e.g.*, Dominguez Decl., Ex. 11 (Intuitive-  
15 00067540) at -540-42. These contractual restrictions provide common evidence for Hospital  
16 Plaintiffs to establish both tying and exclusive dealing related to EndoWrist replacements, as well  
17 as tying and exclusive dealing related to robot service.

18 Regarding Hospital Plaintiffs' Section 2 claim, they present common evidence that  
19 Intuitive maintains monopoly power in the relevant markets. Hospital Plaintiffs show, for  
20 example, that Intuitive and other industry participants do not consider MIST robots to compete  
21 with traditional surgical procedures and that alternative forms of surgery do not constrain  
22 Intuitive's robot prices to competitive levels. Elhauge Class Rep. §§ II.B.2-6. They show further  
23 that Intuitive has enjoyed a near-complete monopoly (99.5-99.6% market shares) in the MIST  
24 robot market since the year 2000, when it first introduced its da Vinci. *See* Elhauge Class Rep.  
25 ¶¶ 163-231. Prof Elhauge opines in support of the monopoly claim that Intuitive's monopoly  
26 power over MIST robots is shown through class-wide evidence of high barriers to entry and direct  
27 evidence of the manufacturer's power to raise prices and exclude rivals. Elhauge Class Rep. §  
28

1 II.C. Prof. Elhauge's report additionally shows the existence of the da Vinci service market as  
2 well as Intuitive's monopoly power therein. *See* Elhauge Class Rep. §§ II.F-G.

3 The Court finds that common issues and common proof of antitrust violations  
4 predominate.

5 **Antitrust Impact**

6 "Antitrust 'impact' – also referred to as antitrust injury – is the 'fact of damage' that results  
7 from a violation of the antitrust laws." *In re Dynamic Random Access Memory (DRAM) Antitrust*  
8 *Litig.*, No. M 02-1486 PJH, 2006 WL 1530166, at \*7 (N.D. Cal. June 5, 2006). To show antitrust  
9 impact, plaintiffs "must establish, predominantly with generalized evidence, that all (or nearly all)  
10 members of the class suffered damage as a result of Defendants' alleged anti-competitive  
11 conduct." *In re High-Tech Emp. Antitrust Litig.*, 289 F.R.D. 555, 567 (N.D. Cal. 2013). "When  
12 individualized questions relate to the injury status of class members, Rule 23(b)(3) requires that  
13 the court determine whether individualized inquiries about such matters would predominate over  
14 common questions." *Olean*, 31 F.4th at 668.

15 Hospital Plaintiffs aim to establish antitrust injury through the common proof of Prof.  
16 Elhauge's opinions. Prof. Elhauge reports that Intuitive's contractual restraints on EndoWrist  
17 repair and third-party da Vinci service harmed all Class members, including by artificially  
18 inflating Intuitive's prices for EndoWrists and da Vinci service, and artificially suppressing the  
19 number of times EndoWrists may be used. Elhauge Class Rep. § VIII. Prof. Elhauge opines that  
20 customers would have paid less for both da Vinci service and replacement EndoWrists in the but-  
21 for world absent Intuitive's allegedly anticompetitive conduct. *See* Elhauge Class Rep. ¶¶ 782,  
22 825. Elhauge's Report evidences that Hospital Plaintiffs can make out through common evidence  
23 all elements of their antitrust claims, including that because each Class member incurred an  
24 overcharge, they can presumably establish antitrust injury. *See* *Olean*, 31 F.4th at 670-73  
25 (affirming district court's finding of common antitrust impact where plaintiffs offered common  
26 evidence capable of showing class members paid "an overcharge"); *see also Hawaii v. Standard*  
27 *Oil Co. of Cal.*, 405 U.S. 251, 262 n.14 (1972) (holding that a plaintiff suffers antitrust injury at  
28 the moment it is overcharged due to the defendant's conduct, and "courts will not go beyond the

1 fact of this injury to determine whether the victim of the overcharge has partially recouped . . .”).  
2 Moreover, it proves up that the putative class has suffered the type of injury the antitrust laws were  
3 intended to prevent and that flows from Intuitive’s purported unlawful acts. *See Brunswick Corp.*  
4 *v. Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 489 (1977).

5 Intuitive, arguing that Hospital Plaintiffs fail to establish antitrust impact, relies on an  
6 expert report from Dr. James W. Hughes, Ph.D. Bass Decl., Ex. 1 (ECF 288-5, “Hughes Rep.”).  
7 Dr. Hughes disagrees with the universality of Prof. Elhauge’s analysis and posits that not all  
8 customers would pay supracompetitive prices for the total package of the da Vinci system,  
9 including the pricing combination of robots, service, and EndoWrists instruments. *See id.* ¶¶ 14-16,  
10 93-100. Indeed, Dr. Hughes projects that in the but-for world Intuitive would increase robot  
11 prices for some Class members by more than it would reduce prices for EndoWrists and robot  
12 service such that some customers would pay more overall, leaving them worse off in the absence  
13 of the alleged ties. *Id.* ¶¶ 14-16, 93-100.

14 Relying on Dr. Hughes’s report, Intuitive devotes much of its opposition to challenging  
15 Hospital Plaintiffs’ showing of common antitrust impact. *See Opp.* at 8-18. Primarily, Intuitive  
16 argues that where a defendant’s sale of “multiple items to the customer as part of an overall  
17 package – such as a machine and consumables used with the machine – injury must be determined  
18 by considering the prices of all parts of the package, including goods for which prices might  
19 increase in the absence of the challenged arrangement.” *Opp.* at 2 (citing *Siegel v. Chicken*  
20 *Delight, Inc.* 448 F.2d 43, 52-53 (9th Cir. 1971) (holding that whether a tie injured the franchisees  
21 required an assessment of the cost or value of the products involved free from unlawful tying)).

22 Intuitive argues, “it is an error of law to assess antitrust injury in a tying case without  
23 considering the totality of the price a customer would have paid in the absence of the challenged  
24 restraint, including a potentially higher price for the tying product . . . because in the but-for world,  
25 where the challenged tying restriction does not exist, a defendant might make different choices as  
26 to how to price the tying product.” *Opp.* at 9 (citing *Chicken Delight*, 448 F.2d. at 52-53).  
27 Intuitive advances that Hospital Plaintiffs fail to provide the necessary analysis of the gross prices  
28 paid by customers, including the combination of the da Vinci robots, EndoWrists, and service, and

1 then finding the net economic harm. Opp. at 9-10. In support of this theory, Dr. Hughes  
2 determines that, in the but-for world absent the tying arrangement, “(a) a significant number of  
3 customers would not have been better off once one takes into account the higher prices they would  
4 have had to pay for their robots, (b) some customers would actually have been worse off [because  
5 of a loss of price discounts and concessions related to robot acquisitions], and (c) identifying the  
6 specific impact on any particular customer requires an individualized analysis.” Opp. at 10 (citing  
7 Hughes Rep. ¶¶ 14-16, 65-99). Given the range of potential damages amounts calculated by Dr.  
8 Hughes, Intuitive argues that the damages calculations are too individualized to support  
9 predominance.

10 The Court briefly analyzes the battle between these experts to the extent it must resolve  
11 factual disputes regarding injury status at this stage. *See Ellis v. Costco Wholesale Corp.*, 657  
12 F.3d 970, 982-83 (9th Cir. 2011) (requiring district courts to “resolve any factual disputes  
13 necessary” to determine whether there was common impact to the class). The Court summarily  
14 dispatches two of Intuitive’s attacks on Prof. Elhauge’s assumptions: a 20% price reduction for  
15 EndoWrists in the but-for world and that EndoWrist use limits would have essentially doubled in  
16 the but-for world. Opp. at 16 (citing in part Hughes Rep. ¶¶ 103-04, 111-112, 113-14). The Court  
17 already addressed and rejected those precise contentions regarding Prof. Elhauge’s opinion in its  
18 Order re Motions to Exclude Expert Witnesses. *See id.* at 18-19. Intuitive presents no new  
19 evidence to disturb the Court’s Order and thus fails to undercut the reliability of Prof. Elhauge’s  
20 opinion.

21 Intuitive further charges that Prof. Elhauge incorrectly contends that Intuitive lowered Xi  
22 da Vinci prices when it introduced Extended Use EndoWrist Instruments in the face of third-party  
23 instrument repair. *See Opp.* at 14 (citing Elhauge Rep. ¶¶ 846, 934). Intuitive cites Dr. Hughes’s  
24 report to show that Intuitive increased the price of certain Xi robots in the relevant period. Opp. at  
25 14 (citing Hughes Rep. ¶ 88). Prof. Elhauge’s rebuttal report rebuffs this pricing assessment as

26  
27  
28

1 failing to control for inflation. Glubiak Decl., Ex. 3 (“Elhauge Class Reply”) ¶¶ 47-49.<sup>4</sup> The  
2 Court finds Prof. Elhauge’s pricing analysis to be more accurate and agrees that, when controlled  
3 for inflation, Intuitive lowered robot prices in that relevant period.

4 Hospital Plaintiffs conversely challenge the assumptions underlying Dr. Hughes’s  
5 opinions. For instance, Dr. Hughes’s package price calculations assign zero value to hospitals’  
6 used robots that are traded in, treating those transactions as pure “discounts,” leading to lower  
7 “actual” prices overall that fail to fully account for the cost to each hospital. Hughes Rep. ¶ 28.  
8 Following submission of his report in support of Intuitive’s Opposition, Hospital Plaintiffs  
9 deposed Dr. Hughes and elicited an admission that he performed no analysis to predict what robot  
10 prices would have been in the but-for world absent Intuitive’s challenged conduct. *See* Glubiak  
11 Decl., Ex. 4 (Hughes Dep.) 168:20-171:14. Dr. Hughes instead simply assumes that Intuitive  
12 would have eliminated all robot discounts in the but-for world and charged all customers “list  
13 prices” based on the disincentives resulting from untying. Hughes Rep. ¶ 94. In the same report,  
14 however, Dr. Hughes repeatedly acknowledges that few customers, if any, ever paid such “list  
15 prices” in the real world. *Id.* ¶ 94; *see also* ¶¶ 28, 48, Fig. 5. Dr. Hughes’s economic assumption  
16 that Intuitive would have eliminated all discounts in the but-for world fails as illogical and  
17 unsupported where the same incentives or rationales for those discounts would still exist in the  
18 but-for world, including credits for trade-ins, free robot servicing for the first year of robot  
19 ownership, and discounts for volume purchases. *See* Elhauge Class Reply ¶ 95. In light of his  
20 defective assumptions, Dr. Hughes’s calculations regarding the total price paid by class member  
21 hospitals in the but-for world are rendered untrustworthy. Not only are these assumptions  
22

23 <sup>4</sup> Intuitive objected to the submission of the Elhauge Class Reply Report. ECF 298. The Court  
24 permitted Intuitive leave to file a brief in response to that Report. ECF 311. The Court ultimately  
25 disagrees with Intuitive’s contention that the Reply Report contains information presented for the  
26 first time, and it finds the Reply Report useful to respond to Dr. Hughes’s Report. The Court  
27 accordingly OVERRULES Intuitive’s objection. The Court notes that district courts regularly  
28 consider rebuttal reports in support of class certification reply briefs. *See, e.g., In re MacBook  
Keyboard Litig.*, No. 5:18-CV-02813-EJD, 2022 WL 1604753, at \*8 (N.D. Cal. Jan. 25, 2022) (“A  
rebuttal expert may cite new evidence and data or introduce new methods of analysis in a rebuttal  
report so long as the new evidence, data, or method is offered to contradict or rebut the opposing  
party’s expert.”); *Olean*, 31 F.4th at 675 (favorably discussing the district court’s consideration of  
an expert rebuttal report).

1 underlying Dr. Hughes's analysis generally difficult to accept in light of the record, the analysis  
2 that results runs headlong against Intuitive's arguments regarding the applicability of *Chicken*  
3 *Delight*'s total package assessment.

4 Intuitive's dependence on *Chicken Delight* fundamentally relies on the theory "that a  
5 rational economic actor forced to adjust the price for one element of a tied package of products  
6 ordinarily will be expected to adjust other elements correspondingly." Opp. at 13 (citing Hughes  
7 ¶¶ 65-92). In *Chicken Delight*, the defendant argued that the separation of tying from tied goods  
8 would result in pricing adjustments that could leave class members unharmed in much the same  
9 way that the Single Monopoly Profit theory, raised in both experts' reports, instructs that the  
10 adjustment of prices for a tied product would be offset by an increase in price for the tying  
11 product. *Id.*, 448 F.2d at 52. Elhauge contends that the Single Monopoly Profit theory does not  
12 apply in this case. Elhauge Class Rep. § VI.E, ¶¶ 674-681. Dr. Hughes seemingly agrees with  
13 Elhauge – he too expressly contends that the Single Monopoly Profit theory does not apply in this  
14 case. Hughes Rep. ¶¶ 78-82. Dr. Hughes argues that Prof. Elhauge's reference to the Single  
15 Monopoly Profit theory is irrelevant here because it analyzes the legality of a tie; Dr. Hughes  
16 avers that his analysis does not rely on the Single Monopoly Profit theory and instead focuses on  
17 analysis of the total price paid by Class member hospitals. *See id.* But more importantly, Dr.  
18 Hughes's conclusion – that the ties reduced robot prices – at least implicates the Single Monopoly  
19 Profit theory, particularly where he provides no alternative theory to explain his predicted  
20 offsetting price increase for robots. *See* Elhauge Class Reply ¶ 68. While Intuitive and Dr.  
21 Hughes aim to distinguish Single Monopoly Profit theory from their theory of Intuitive's total  
22 package pricing based on the "basic economic principle" that a price increase of a tying good such  
23 as robots would necessarily result from a decrease in the price of a tied service or good such as  
24 EndoWrists, they avoid naming this "basic" principle or citing any economic literature in support  
25 thereof. Opp. at 11, 13; *see also id.* at 12 (claiming to rely on "common sense and established  
26 economic theory"). If the Court accepts both experts' opinions that Single Monopoly Profit theory  
27 does not apply here, then it is left with only one expert whose opinion gives meaningful economic  
28 insight regarding pricing in the but-for world – Prof. Elhauge.

1       The dispute regarding proof of antitrust harm accordingly boils down to a merits question  
2 limited to the tying claims, leaving the exclusive dealing and monopolization claims intact and  
3 ripe for class-wide assessment. Plaintiffs need not prevail on their claims as a matter of law at this  
4 stage. *See Amgen*, 568 U.S. at 466 (“Rule 23 grants courts no license to engage in free-ranging  
5 merits inquiries at the certification stage.”). Rather, they must demonstrate that a common issue  
6 could be resolved in a single stroke. *See Tyson Foods*, 577 U.S. at 457 (concluding that arguments  
7 that an expert study is “unrepresentative or inaccurate” go to the merits and do not defeat class  
8 certification). “In determining whether the “common question” prerequisite is met, a district court  
9 is limited to resolving whether the evidence establishes that a common question is capable of  
10 class-wide resolution, not whether the evidence in fact establishes that plaintiffs would win at  
11 trial.” *Olean*, 31 F.4th at 666-67.

12       In sum, with the assistance of Prof. Elhauge’s opinion, the Hospital Plaintiffs have shown  
13 that common issues predominate. If a jury is persuaded by Hospital Plaintiffs’ class-wide  
14 evidence at trial, the Class as a whole will win, and if the jury remains unpersuaded, the entire  
15 Class will lose. The Class members’ claims are “entirely cohesive” and will “prevail or fail in  
16 unison” such that no further inquiry into the merits is appropriate. *Amgen*, 568 U.S. at 460. The  
17 Court finds that common issues of antitrust impact predominate.

18 **Antitrust Damages**

19       Once plaintiffs have established an antitrust violation and antitrust injury, courts require  
20 only a reasonable estimate of the amount of damages they have suffered. *See Comcast Corp. v.*  
21 *Behrend*, 569 U.S. 27, 35 (2013) (if plaintiffs “prevail on their claims,” damages “[c]alculations  
22 need not be exact” (citation omitted)). “To show that common questions regarding damages  
23 predominate, Plaintiffs must demonstrate the calculations proposed to determine damages use  
24 common evidence.” *In re Packaged Seafood Prods. Antitrust Litig.*, 332 F.R.D. 308, 328 (S.D.  
25 Cal. 2019) (citing *Meijer, Inc. v. Abbot Labs.*, No. C 07-5985 CW, 2008 WL 4065839, at \*7 (N.D.  
26 Cal. Aug. 27, 2008)).

27       Prof. Elhauge presents a method for calculating class-wide damages. *See Elhauge Class*  
28 *Rep.* § VII. Having already found Prof. Elhauge’s damages model adequate to survive Intuitive’s

1 *Daubert* challenge, *see* Order re: Mots. Exclude Expert Witnesses (ECF 231) at 15-22, the Court  
2 finds that his damages model also meets the standard for Rule 23(b)(3) predominance. *See In re*  
3 *Packaged Seafood Prods.*, 332 F.R.D. at 328 (relying on damages model presented through expert  
4 report that survived *Daubert* challenge).

5 **ii. Statute of Limitations**

6 Intuitive also argues that Hospital Plaintiffs' Class definition defeats predominance  
7 because it improperly sweeps in a large number of hospitals whose claims are barred by the statute  
8 of limitations. Opp. at 18-19. The four-year statute of limitations for Hospital Plaintiffs' Sherman  
9 Act claims runs from the date of the allegedly anticompetitive contracts. 15 U.S.C. § 15b; *see also*  
10 *Aurora Enters., Inc. v. Nat'l Broad. Co.*, 688 F.2d 689, 693-94 (9th Cir. 1982). Intuitive reasons  
11 that, because almost 550 hospitals signed contracts with Intuitive before May 21, 2017,  
12 predominance cannot be met because Hospital Plaintiffs "have identified no class-wide proof of  
13 conduct after that date that would restart the statute of limitations period for those contracts."  
14 Opp. at 3; *see also id.* at 18-19.

15 First, Intuitive's argument relies on an absence of class-wide proof, but as detailed above,  
16 the Court has already found Hospital Plaintiffs present class-wide proof supporting each tying,  
17 exclusive dealing, and monopolization claim, including through Prof. Elhauge's opinions. Second  
18 and more relevant, the Ninth Circuit has "repeatedly held that acts taken to enforce a contract [are]  
19 overt acts that restart[] the statute of limitations." *Samsung Elecs. Co. v. Panasonic Corp.*, 747  
20 F.3d 1199, 1204 (9th Cir. 2014); *see also Hennegan v. Pacifico Creative Serv., Inc.*, 787 F.2d  
21 1299, 1301 (9th Cir. 1986) (holding "that a cause of action accrued each and every time that a  
22 tourist was shepherded away from the plaintiff's non-preferred shop because even though the  
23 agreement predated the limitations period, the agreement itself did not 'immediately and  
24 permanently destroy' plaintiff's business nor did it cause 'irrevocable, immutable, permanent, and  
25 final' injury").

26 Intuitive's attempt to bury its head in the sand in regarding the conduct complained of in  
27 this case, which largely postdates the execution of the sales and lease agreements for da Vinci  
28 robots, necessarily fails. For example, Hospital Plaintiffs charge that Intuitive engaged in

monopolistic conduct by including the “use counter” in every EndoWrist purchased by every Class member during the limitations period. *See, e.g.*, Elhauge Class Rep. ¶¶ 45-46; *see also* Dominguez Decl., Ex. 5 (Rubach Rep. (ECF 267-6)) ¶¶ 18, 30-32. Hospital Plaintiffs further charge that Intuitive acted to exclude independent repair companies (“IRCs”) from participating in the EndoWrist or service markets after 2017. *See, e.g.*, Elhauge Class Rep. ¶¶ 431-436, 474, 560-561. Importantly, while the antitrust claims at issue rely foundationally on the existence of contracts between hospitals and Intuitive, Hospital Plaintiffs present evidence that not all the harm occurred at the time of the original contracting. Intuitive’s more recent conduct constitutes “overt acts” sufficient to restart the limitations period. Intuitive’s statute of limitations defense does not defeat predominance.

### b. Superiority

12 Among the other Rule 23(b) elements, plaintiffs must also show that “a class action is  
13 superior to other available methods for fairly and efficiently adjudicating the controversy.” Fed.  
14 R. Civ. Proc. 23(b)(3). The Federal Rules provide four considerations for courts assessing  
15 superiority:

- (A) the class members' interests in individually controlling the prosecution or defense of separate actions;
- (B) the extent and nature of any litigation concerning the controversy already begun by or against class members;
- (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and
- (D) the likely difficulties in managing a class action.

22 Fed. R. Civ. Proc. 23(b)(3)(A)-(D). The superiority requirement “requires the court to focus on  
23 the efficiency and economy elements of the class action so that cases allowed under subdivision  
24 (b)(3) are those that can be adjudicated most profitably on a representative basis.” *Zinser v.*  
25 *Accufix Rsch. Inst., Inc.*, 253 F.3d 1180, 1190 (9th Cir.), *as amended*, 273 F.3d 1266 (9th Cir.  
26 2001).

27 Intuitive avers that the class mechanism is not superior to individual litigation due to the  
28 size of potential damage awards – “[i]ndividual class members have sufficient economic incentive

1 to bring their claims individually.” Opp. at 23 (citing *Bowerman v. Field Asset Servs., Inc.*, 60  
2 F.4th 459, 471 n.8 (9th Cir. 2023)). The Ninth Circuit acknowledges that substantial damage  
3 awards may weigh against the superiority of a class action. *Bowerman*, 60 F.4th at 471 n.8.  
4 Indeed, class members estimate sizeable damages claims: Prof. Elhauge estimates total damages  
5 greater than \$58,802 for at least 95% of class members, with totals ranging as high as  
6 \$12,392,910. *See* Elhauge Class Rep. at Tbl. 28.

7 Hospital Plaintiffs counter that large damage awards do not defeat superiority. *See* Reply  
8 at 19 (citing, e.g., *Brice Yingling v. eBay, Inc.*, 2010 WL 11575128, at \*6 (N.D. Cal. July 16,  
9 2010) (“The mere fact that some class members may have suffered significant damages does not  
10 detract from the overall efficiency and economy of resolving the claims of the entire class in a  
11 single action.”)). The Court agrees in light of the efficiency to be gained by resolving the antitrust  
12 claims against a single defendant in one action. Moreover, high litigation costs weigh against the  
13 Class members’ interests in individually controlling the prosecution of their claims. *See Wolin v.*  
14 *Jaguar Land Rover N. Am., LLC*, 617 F.3d 1168, 1175 (9th Cir. 2010) (“Where recovery on an  
15 individual basis would be dwarfed by the cost of litigating on an individual basis, this factor  
16 weighs in favor of class certification.”); *see also* Fed. R. Civ. P. 23(h) (permitting recovery of non-  
17 taxable costs in a certified class action). Hospital Plaintiffs argue that expert costs in a complex  
18 antitrust case such as this one favor proceeding via class action because expert costs, which may  
19 total millions of dollars, are recoverable in a class action, but they would otherwise wipe out an  
20 individual prevailing plaintiff’s entire six- or seven-figure damage award. Reply at 13. The cost  
21 of litigating a complex antitrust case such as this one is clearly significant – the Court recently  
22 held a three-week trial in the related antitrust case, *Surgical Instrument Service Co., Inc. v.*  
23 *Intuitive Surgical, Inc.* (N.D. Cal. 21-cv-3496), which included testimony of several experts and  
24 demonstrated the effort and expense related to prosecuting an antitrust action such as this. No  
25 individual hospital appears interested in taking on the substantial financial burden to pursue an  
26 antitrust claim against Intuitive, as demonstrated by the absence of separate lawsuits filed.  
27 Further, concentrating the litigation of the claims here in the Northern District of California is  
28 favorable because this is Intuitive’s home forum, where much of the relevant evidence and many

1 of the key witnesses are located. The Court finds these economic- and efficiency-based concerns  
2 outweigh Class members' interests in pursuing individualized litigation and fail to negate  
3 superiority.

4 Finally, there are two disputes regarding the final factor – manageability. Both disputes  
5 are inconsistent with the “well-settled presumption that courts should not refuse to certify a class  
6 merely on the basis of manageability concerns.” *Briseno v. ConAgra Foods, Inc.*, 844 F.3d 1121,  
7 1131 (9th Cir. 2017). The thrust of the first dispute mirrors Intuitive’s contention that  
8 individualized inquiries predominate based on the *Chicken Delight* analysis discussed above. This  
9 dispute, including Intuitive’s contention that the damages calculations will require individualized  
10 assessments, does not render the class unmanageable.

11 The second dispute centers on the “government hospital” exclusion in Hospital Plaintiffs’  
12 proposed definition noted in relation to Valley Medical’s adequacy, above. Intuitive argues that  
13 there is no single accepted test for evaluating the definition of “government hospital,”  
14 necessitating an individualized assessment of whether each putative class member is a government  
15 hospital and rendering the class unmanageable. Further still, Intuitive avers that Hospital  
16 Plaintiffs cannot resolve this problem by eliminating the exclusion of state and local government  
17 hospitals from the putative class because the Eleventh Amendment prohibits inclusion of state  
18 entities in a certified class without their affirmative consent. Opp at 24 (citing *Walker v. Liggett*  
19 *Grp., Inc.*, 982 F. Supp. 1208, 1209-11 (S.D. W.Va. 1997); *In re Auto. Parts Antitrust Litig.*, 2015  
20 WL 14047405, at \*7 (E.D. Mich. Apr. 30, 2015).

21 Intuitive’s argument that the class will be unmanageable because it includes state and local  
22 hospitals misapprehends the Class definition, and it ignores the bounds proffered by Hospital  
23 Plaintiffs and Prof. Elhauge. As Intuitive acknowledges, Prof. Elhauge’s damages calculations  
24 exclude only hospitals run by the Departments of Defense and Veterans Affairs and otherwise  
25 include other hospitals that are state and local governmental entities, such as Valley Medical. *See*  
26 Opp. at 23-25. The exclusion of hospitals run by the Departments of Defense and Veterans  
27 Affairs appears to be readily achievable, and Hospital Plaintiffs raise no dispute about refining the  
28 class definition to include state and local hospitals more clearly. The inclusion of those

1 government-run entities poses no problem for class manageability.

2 On the topic of sovereign immunity, Intuitive misses that sovereign immunity applies only  
3 to lawsuits “commenced or prosecuted against” the states. U.S. Const. amend. XI. Said another  
4 way, the Eleventh Amendment serves as a shield, not as a limit to a government entity’s  
5 participation in class action litigation as a plaintiff or class member. *Id.*; *see also California ex*  
6 *rel. Lockyer v. Dynegy, Inc.*, 375 F.3d 831, 847 (9th Cir. 2004), *amended on denial of reh’g*, 387  
7 F.3d 966 (9th Cir. 2004) (describing sovereign immunity as “protection from being sued”). The  
8 Eleventh Amendment does not prevent state or local government entities from participating in a  
9 class action. And even if sovereign immunity had that effect, the opt-out rights provided by Rule  
10 23 adequately protect states’ entitlement to proceed on their own behalf. Therefore, contrary to  
11 Intuitive’s contentions, the government hospitals exclusion does not pose a problem for class  
12 manageability.

13 Taking all of these Rule 23(b)(3) factors into account, the Court finds that maintaining this  
14 action as a class action would be superior to individual actions.

## 15 2. Rule 23(b)(2)

16 Hospital Plaintiffs additionally seek to certify a class for injunctive relief under Rule  
17 23(b)(2). Mot. at 24-25. “Rule 23(b)(2) allows class treatment when ‘the party opposing the class  
18 has acted or refused to act on grounds that apply generally to the class, so that final injunctive  
19 relief or corresponding declaratory relief is appropriate respecting the class as a whole.’ *Dukes*,  
20 564 U.S. at 360 (quoting Fed. R. Civ. P. 23(b)(2)). “Unlike Rule 23(b)(3), a plaintiff does not  
21 need to show predominance of common issues or superiority of class adjudication to certify a Rule  
22 23(b)(2) class.” *In re Yahoo Mail Litig.*, 308 F.R.D. 577, 587 (N.D. Cal. 2015). Rather, Rule  
23(b)(2)’s “requirements are unquestionably satisfied when members of a putative class seek  
24 uniform injunctive or declaratory relief from policies or practices that are generally applicable to  
25 the class as a whole.” *Parsons v. Ryan*, 754 F.3d 657, 688 (9th Cir. 2014).

26 Here, whether Intuitive’s conduct is anticompetitive requires a market-wide analysis, and if  
27 found to be unlawful, any potential injunctive remedy necessary to address such market-wide  
28

1 conduct is necessarily indivisible. Thus, the proposed class satisfies the requirements of Rule  
2 23(b)(2).

3 Intuitive argues that the Court should decline to certify Plaintiffs' proposed Class under  
4 Rule 23(b)(2). Several of Intuitive's arguments against a (b)(2) class are derivative – Intuitive  
5 argues that a (b)(2) class fails for lack of adequacy and typicality, and Intuitive argues that  
6 questions of antitrust impact do not predominate, all of which are dispelled above. The Court does  
7 not rehash its analysis. Intuitive additionally argues that Plaintiffs have not satisfied Rule 23(b)(2)  
8 because they provide no specificity as to the injunctive relief they seek. Opp. at 25 (citing *N.*  
9 *Brevard Cnty. Hosp. Dist. v. C.R. Bard, Inc.*, 710 F. Supp. 3d 1090, 1114 (D. Utah 2023) (denying  
10 certification where plaintiff's motion lacked "any 'reasonably particular detail' as to the injunctive  
11 relief sought")). But Plaintiffs are not required to specify the injunctive relief they will  
12 ultimately seek. *B.K. by next friend Tinsley v. Snyder*, 922 F.3d 957, 972 (9th Cir. 2019)). The  
13 specificity required by Rule 23(b)(2)

14 ordinarily will be satisfied when plaintiffs have described the  
15 general contours of an injunction that would provide relief to the  
16 whole class, that is more specific than a bare injunction to follow the  
17 law, and that can be given greater substance and specificity at an  
18 appropriate stage in the litigation through fact-finding, negotiations,  
19 and expert testimony.

20 *Id.* at 972 (quoting *Parsons v. Ryan*, 754 F.3d 657, 689 n.35 (9th Cir. 2014)). The "general  
21 contours of an injunction" sought here may include a prohibition on the enforcement of portions of  
22 Intuitive's contracts that implicate unlawful tying or exclusive dealing for EndoWrists and service.  
23 That level of specificity is sufficient at this stage. "A more specific injunction will depend on  
24 further fact-finding and what claims the plaintiffs actually prove through further litigation."  
25 *Snyder*, 922 F.3d at 972. Therefore, to the extent that Hospital Plaintiffs seek to certify a Rule  
26 23(b)(2) class for injunctive relief only, the Court GRANTS the motion for class certification.

27 //

29 //

1           **III. CONCLUSION**

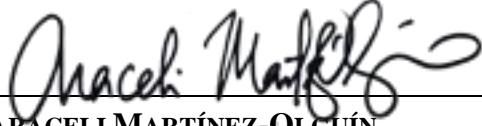

2           For the foregoing reasons, the Court hereby **GRANTS** Hospital Plaintiffs' motion to  
3           certify a class action. The Court defines the Class to include

4           All entities that purchased da Vinci service and EndoWrists from  
5           Intuitive in the United States at any time from May 21, 2017, to  
6           December 31, 2021.

7           Hospitals run by the Departments of Defense and Veterans Affairs are excluded from the Class.

8           **IT IS SO ORDERED.**

9           Dated: March 31, 2025
